Gina Lee
WhaleTeq
Taipei City, Taiwan

Dear Gina,

I am writing to let you know that VivaQuant, Inc. has now received FDA clearance on its RX-1 Remote Cardiac Monitoring System. As you know, we purchased two of your ECG 2.0 simulators for testing this device in preparation for FDA submission. The results of the testing performed using the WhaleTeq simulators was accepted by both our CB and the FDA. We have found the ECG 2.0 to be a very powerful tool for testing our devices. It accepts data from the standard databases and accurately and reliably plays the data back for testing. In addition, it allows us to generate special test series in Matlab and download those test series easily into the WhaleTeq for output to our device for testing.

In addition to the technical capabilities of your system, we have also been very impressed with quality of technical support and service. Your staff have been very responsive as questions arose about using your simulator in unusual or demanding situations.

Thank you again for making a great product. It is an import component of our suite of development tools.

Sincerely yours,

A handwritten signature in black ink that reads 'Brian P. Brockway'. The signature is written in a cursive style with a large, stylized 'B' at the end.

Brian Brockway
