## Letter of recommendation for WhaleTeq ECG Test Units and assistant software

Dear Mrs. Chen,

Our company is using the Whaleteq MEEG, SECG and CMMR test units for development and testing of ECG devices. In this letter I would like to tell you my experiences with your products.

The Whaleteq equipment is very supporting, because it is easy to use and the assistant software guides you through the different tests of the relevant standards, i.e. the IEC 60601-2-25. The descriptions and example figures in the software also help to better understand the sometimes complicated expressions of the IEC standards.

With the Whaleteq solutions our team is able to validate our products in a very efficient way, because using the automated test sequences saves a lot of time.

Thanks very much for these great products!

Best regards,

Dr. Tobias Tröger  
Head of Research and Development  
Corscience GmbH & Co. KG
